DOUBLE BRACE JACKJAW

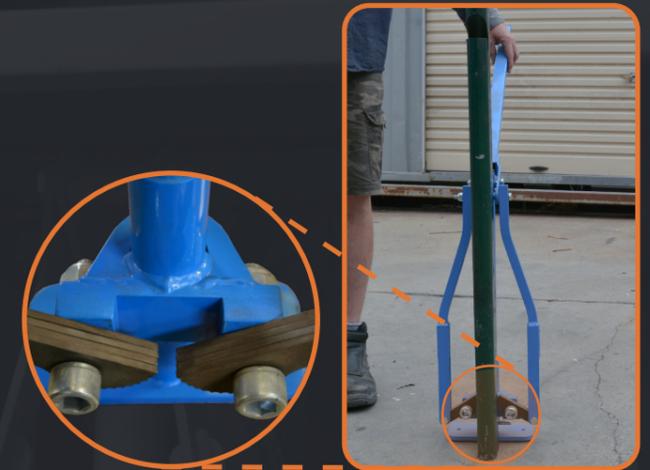

TWICE THE STRENGTH
TWICE THE EFFICIENCY

JackJaw GUARD RAIL STYLE

Available in one size and colour

The JackJaw 60mm Guard Rail Puller is built from high-grade steel and equipped with durable, replaceable Bisalloy 360 laser-cut jaws. Purpose-designed for removing guard rail posts, it delivers strength and precision with every use. Its reinforced base plate mounts securely to timber, distributing weight evenly to ensure smooth, efficient, and effortless post extraction.

Extra-Long Handle with Extendable Height
The JackJaw model features an extra-long, height-adjustable handle for easier, more comfortable operation. Adjustable from 700 mm to 950 mm in six 50 mm increments, it ensures convenience for users of all heights.

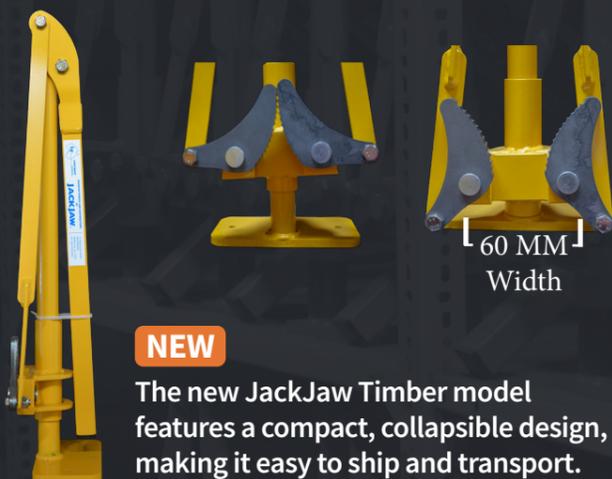

Unmatched Gripping Power
The Guard Rail Style JackJaw is equipped with four high-strength jaws for exceptional grip and long-lasting durability. Designed to exceed the performance of other models, it delivers enhanced power, reinforced components, and maximum efficiency on every job.

JackJaw TIMBER (60MM)

Available in one size and colour

The JackJaw Peg Puller makes removing timber pegs quick and hassle-free. Whether you're pulling wooden pegs from the garden, a nursery, or survey pegs for site layout, this tool gets the job done with ease.

NEW

The new JackJaw Timber model features a compact, collapsible design, making it easy to ship and transport.

Specialised in Timber Stakes

With just a few simple pumps of the JackJaw handle, the peg is effortlessly released from the ground, saving time and effort on every job.

Long Lasting Stakes!

Our patented jaw and lever mechanism makes removing stakes and posts effortless without bending or damage. Built to endure, it protects your valuable stakes and keeps them straight for years.

With its patented jaw design, this innovative tool grips firmly at the peg's base, delivering maximum power for fast, effortless extraction with just a few handle pumps.

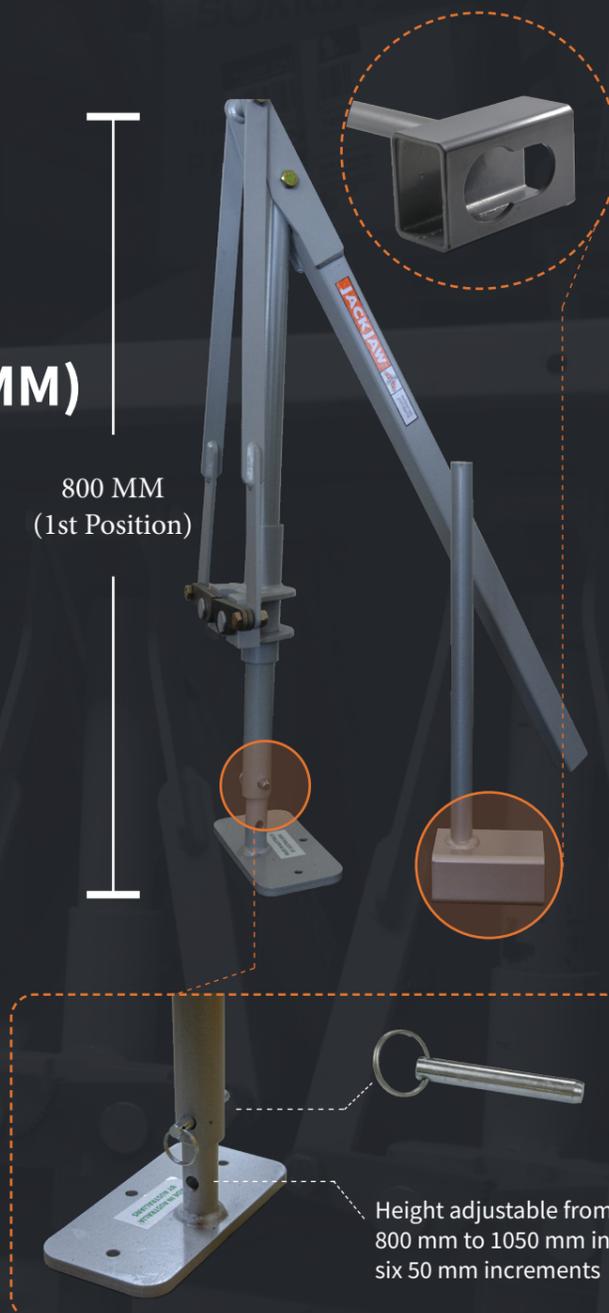

JackJaw TENT STAKE REMOVER (35MM)

Effortlessly remove tent and marquee stakes with the durable and reliable JackJaw Tent Stake Remover.

This innovative tool ensures efficient stake extraction without causing damage, making it an essential addition to your setup and takedown process.

Adjustable Shaft

Designed with user comfort in mind, the extendable shaft allows for adjustable height, accommodating users of different statures. Built for convenience and performance, the JackJaw offers a hassle-free solution to removing stakes quickly and safely.

+ Additional Adaptor

This adaptor simplifies the stake removal process by securely attaching to the mushroom head of the stake. It provides a firm grip, allowing users to effortlessly extract stakes from the ground.

PEG PULLER ATTACHMENT

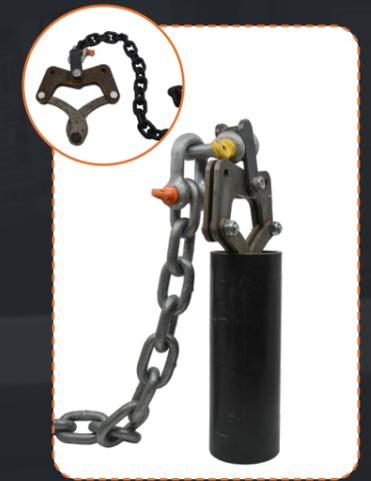

Available in one size and colour

The JackJaw is designed for ease of use and safe operation, making it an ideal tool for form workers and concreters. Highly effective for star picket removal, it is also compatible with excavators, bobcats, tractors, and backhoes. Featuring a 10mm opening, the JackJaw Excavator Attachments deliver versatility and reliability across a wide range of applications.

INVERTED JACKJAW

The Inverted JackJaw Sleeve Puller is a durable, versatile tool designed for reliability and precision. Crafted from high-grade steel with replaceable Bisalloy 360 laser-cut jaws, it ensures long-lasting performance. Lightweight and ergonomically designed for effortless handling, it offers secure and efficient operation, with models available in various jaw sizes to suit different needs.

Sizing Specifics

- Model 01:** For 25–50 mm materials
- Model 02:** For 45–75 mm materials
- Model 03:** For 75–100 mm materials

Difference Between Inverted JackJaw and Standard Models

Unlike traditional pullers, the Inverted JackJaw is engineered with inside-gripping inverted jaws. This unique design delivers unmatched accuracy in removing poles, sleeves, and other embedded materials, perfect for tough or specialised jobs.

Additional Accessories Available!

In addition to the Peg Puller Machinery-Driven Attachment, customers can select from a variety of accessories to meet their specific needs. The lifting sling and chain, complete with a D-shackle, ensure effortless removal of various materials while preventing bending or damage.
